Editor's Column

I had just completed 7 years as MAPAN's editor. Time flies when you're working at one of the best department of our college, and in a company full of brilliant people who care so much about what we do every day. The results show the superiority of our students in technical knowledge as well as in extracurricular activities. The quality publications by faculty members and students reflect the pre-eminency in research and development of instrumentation engineering. Also, the students are working for social and rural cause. This year, the project on drinking water disinfection in rural area won the prestigious Forbes Marshal award. TE student Ms. Kalyani Natu has been selected as the best volunteer in National Social Service. Let me thank to one and all for being part of department' success.
