MESSAGE FROM HoD

A warm welcome to all the students of the department after Semester I examinations followed by vacation. Hope you all are geared up to learn new subjects. Second semester is full of fervor of enthusiasm. Hope you have started planning for excelling in 'Damini' and 'Gandhar'. All the best! Show your talents!

Dr.Anagha Kulkarni

FROM THE EDITOR'S DESK

21st century regarded as the millennium of technology, with women being crowned as the leaders of the era. Opportunities do surface for people, just to catch hold of it at right time is where it makes all the difference. As rightly said by Mr. Warren Bennis "Leadership is the capacity to translate vision into reality.

Confidence, hardwork and the passion to drive a change is all that it needs to transform followers to leaders. So hoping that we Cummins girls will be path breaking leaders of the future who will leave their mark on the global IT industry.

As the next edition of DIG-IT is put in print ,we are extremely grateful to creative minds to pen their thoughts and allow us to Spotlight in this edition of DIG-IT.

TECHNOLOGY AND SECURITY IN 21st CENTURY

Technology today has become so intrinsic to human life that it is taken for granted. Its contribution is recognized more by its absence, when it is not available or denied. The pursuit of technology is thus very natural to human beings and nations: whether small or big, more developed or less developed; whether it be for survival, defence, development, or at times for more devious designs. Notwithstanding the negative implications, diffusion and proliferation of technology is unavoidable in today's interdependent world. Real solutions for international peace and stability will have to be based on the sharing of technology benefits by all human beings without artificial discrimination. However, in the real world all cannot be equal. The future of mankind will therefore depend on the skilful management of technologies in a manner designed to reduce conflicts and

to foster cooperation and peaceful coexistence. This will be the greatest challenge of the 21st century.

The definition of an enemy has become blurred, and even the identity of adversaries and friends has become subject to changing technoeconomic priorities and changing times. It has been calculated that multinational companies, with transnational suppliers, production centres and financial support, are responsible for more than half of the world's industrial output. Government agencies are no longer able to exert the same level of control over technological development or technology acquisition. Economic compulsions have created a new culture of modular designs for using off-the-shelf components to save on R&D costs, and major industrial concerns regularly outsource many of their assembly and manufacturing jobs to more cost-effective regions of the world, many of which are in the developing nations.

Hence it is very important to secure our technology and prevent ourselves from threats. Security is a must for every domain and for a developing nation like India it becomes very important to secure the privacy and data.

**-Urmi Parmar

ROBIN : THE ONLY CLOUD-FIRST SMARTPHONE

Nextbit, a mobile company that boasts of veterans from Apple, Google, and HTC on its team, has unveiled its much-anticipated reasonably priced first

Android smartphone, Robin. The device offers flagship stature specifications and is being sold through a Kickstarter campaign.

Scott Croyle, Nextbit's Chief Product and Design Officer who is also a former design lead for HTC says "The big idea behind the Robin is that not only does it have 32GB of internal storage, it also comes with 100GB of cloud storage completely free."

When you've maxed out the capacity on your phone, Robin is intelligent enough to slowly offload lesser used apps and/or media to the cloud. "It's a unique hybrid approach" said Croyle.

As for photos, he says that if you choose to back them up in the cloud, the phone will only load up the original high-resolution images while keeping downsampled versions in local storage so you can see what you have stored away. You don't always have to use the cloud either; it's completely up to you if you want to enable cloud storage for just media, just

apps, both media and apps, or not use it altogether.

What is perhaps even more impressive however, is that hardware. It's a nicely designed device, with straight sides, a slim profile and cool colors; it comes in both "mint" green and "midnight" blue. On the right side is a power button that also doubles as a fingerprint sensor; just tap and hold it to unlock your phone. In addition to the regular microphone on the bottom, there's also a noise-canceling microphone at the top. As for the rest of the hardware, it also has a 13-megapixel camera, LED flash, a 5.2-inch 1080p screen and a USB-C port.

The Nextbit Robin is available for purchase through Kickstarter with a \$500,000 funding goal. The first 1,000 backers can snag the smartphone for \$299 (roughly Rs. 19,800). Other will have to cough up \$349 (roughly Rs. 23,100) to snag the device. The company says that it would eventually start selling the smartphone to all for a retail price of \$399 (roughly Rs. 26,400). The device will begin shipping January 2016.

So, be alert!!!

A PLEA FROM THE NATURE

Let's all promise the mother earth,

The mother earth that says to us,
You are killing me for a lavish lifestyle,
Like you speak of dinosaurs today,
Still you have time to think of Global Warming,
Before it gets too late take steps to improve my fate,
You will be hale, hearty and wise,

O'Mankind, you are crying for a smile,
Your style will make you a history soon,
A new race will talk about humans one day,
Which till date is just a warning.

By just paying a little price!!!!

SANIYA WADHWA, TE IT

DON'T YOU QUIT

When things go wrong, as they sometimes will,
When the road you're trudging seems all uphill,
When the funds are low and the debts are high,

And you want to smile, but you have to sigh,
When care is pressing you down a bit-
Rest if you must, but don't you quit.

Life is queer with its twists and turns,
As every one of us sometimes learns,
And many a fellow turns about
When he might have won had he stuck it out.
Don't give up though the pace seems slow -
You may succeed with another blow.

Often the goal is nearer than
It seems to a faint and faltering man;
Often the struggler has given up
When he might have captured the victor's cup;
And he learned too late when the night came down,
How close he was to the golden crown.

Success is failure turned inside out -
The silver tint in the clouds of doubt,
And you never can tell how close you are,
It might be near when it seems afar;
So stick to the fight when you're hardest hit -
It's when things seem worst that you must not quit...

THE WAY OF THE WILL

When there is a will,
there is definitely a way.

For the above written line
a poet has to say,
never ever lose hope
and climb the success rope.
Put your best of efforts
forgetting all your comforts,
Be the maker of your destiny
Earn name, fame and money.
Put your heart, mind and soul
And fulfill your aim and goal.
Work hard with dedication and devotion,
You will surely reach your destination.
Have faith in the Almighty Lord,
You will be taken care of
by the Great God.
