

Internship Highlights

The rise in global competition has prompted organizations to devise strategies to have a talented and innovative workforce to gain a competitive edge. Internship exposes students to best practices in the industry, knowledge in their respective domain, professional technical skills, real world challenging problems and soft skills.

Cummins College of Engineering for Women, Pune is committed to ensuring our graduates are not only academically strong but also highly employable.

And hence, in line with the guidelines by AICTE and on the strong recommendations received through stake holder's feedback, CCEW have launched a six months Internship program. Thus, students are required to undergo Internship in the 7th semester of engineering.

The duration of Internship can be minimum of two months and maximum up to six months. Students are allowed to do multiple internships during the span of six months. Those who did not receive internship, they take six months departmental project or industry sponsored project.

During the internship, students are expected to work with the organization on a significant project or complete significant work assignments. The internships may take different forms like short projects, solving real world problems with technology, work assignments, learning technical tools, hands-on experience in new domains, use of technology to support business processes etc.

Various multinational companies like Microsoft, Dell, Citi Bank, Barclays, MasterCard, Providence etc. offer internships to Computer Engineering students. Also, students opt to work in start-ups to get more specific technological exposure. Getting exposure to new cutting edge technologies, Pre-placement offers, opportunities to get good placements are some of the important outcomes of our internship program.
